

DEMOGRAPHICS

Demographic data were drawn from 556 youth, across the ten site providers. Results of simple descriptive analyses suggest that the majority of youth served by Wraparound in Virginia identify as male, White, and in the 13 to 15-year old age range, although ages varied widely (see Figures 1 through 3). Additionally, Figure 4 shows the number of clients per site included in this report. Note that the VA CANS data set has a high level of missing data. Total responses for individual items are included in the figures and tables throughout this document.

Figure 1. Gender. N=556, 117 did not specify the gender identity of the child.

Figure 2. Race. N=556, 141 did not specify the racial identity of the child.

Figure 3. Age. N=556, 131 did not specify age of the child.

Figure 4. Site Providers. N=556, 227 did not specify the site providing wraparound services.

COMPARISON GRAPHS OF ACTIONABLE NEEDS

The following figures show the percentage of actionable needs at enrollment and the at 3rd CANS assessment (typically at about 6 months post-enrollment). Figure 5 includes results for all fourteen items in the CANS; and Figures 6-9 include individual items separated by category. CANS data indicate a decrease in actionable needs between the 1st and 3rd assessment points, except for 'involvement with care' in the Current Caregiver category.

Figure 10 includes response rates at enrollment and at the 3rd CANS assessment. Given that not all youth were assessed three times, we see that responses are lower at the 3rd CANS assessment across all items.

Figure 5. Percent of actionable needs at enrollment and at the 3rd CANS assessment by category.

Figure 6. Percent of actionable needs at enrollment and at the 3rd CANS assessment for Life Domain Functioning.

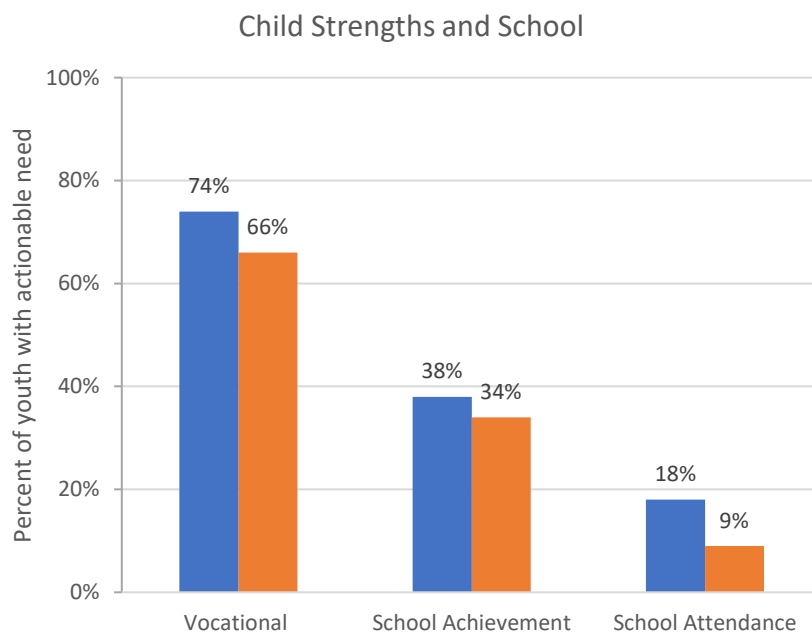

Figure 7. Percent of actionable needs at enrollment and at the 3rd CANS assessment for Child Strengths and School.

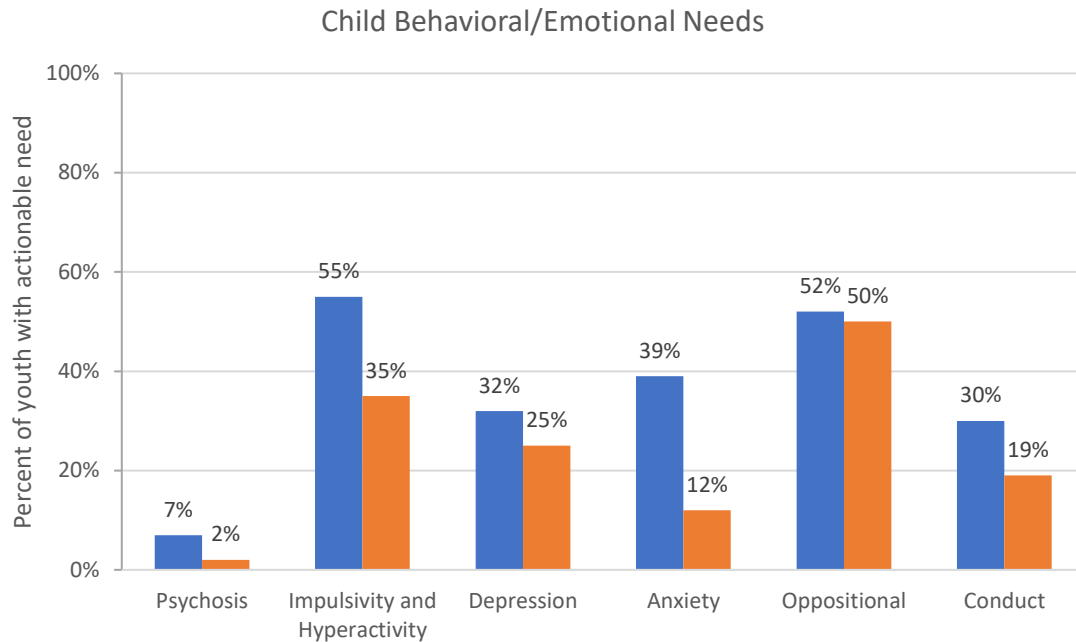

Figure 8. Percent of actionable needs at enrollment and at the 3rd CANS assessment for Child Behavioral/Emotional Needs.

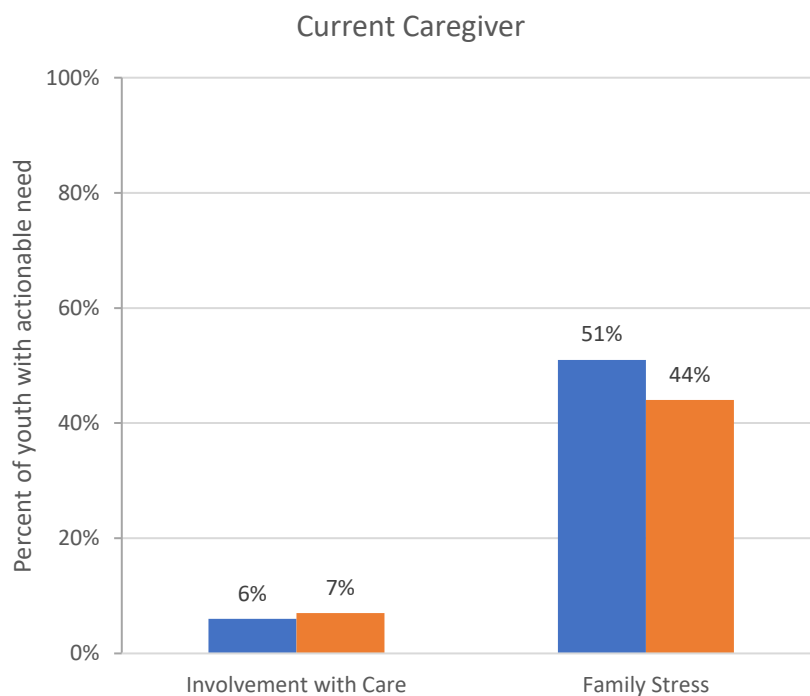

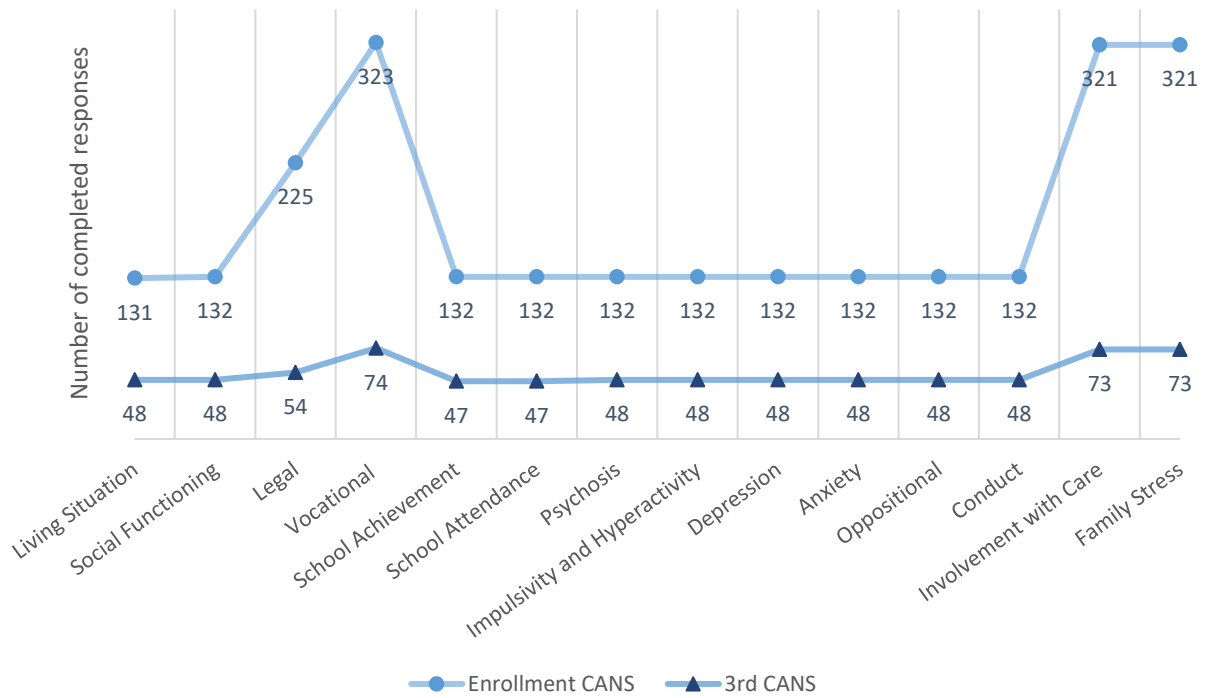

Figure 9. Percent of actionable needs at enrollment and at the 3rd CANS assessment for Current Caregiver.
